

# How to Make the Jordan Cove LNG Project a Reality

## Submit a public comment to the Federal Energy Regulatory Commission (FERC)

FERC released its draft Environmental Impact Statement (EIS) on the Jordan Cove Project in March 2019, opening a public comment period that will run through **July 5, 2019 at 2:00pm PT**. These public comments on the draft EIS will help FERC make its final decision whether or not to allow the project to proceed.

---

### How to write your FERC comment:

**Comments don't have to be technical, but they should be about why you support the project and its many benefits, including:**

- Over 6,000 construction and 215 permanent, local, living wage jobs will be created
- \$110 million in new, annual tax revenue across the state, including \$60 million to Coos, Douglas, Jackson and Klamath Counties
- Increasing LNG exports can help lower global greenhouse gas emissions

For more information on how to write your comment, visit [act.jordancovelng.com](http://act.jordancovelng.com).

*All comments must include reference to the Project docket numbers (CP17-494-000 and CP17-495-000)*

---

### How to submit your FERC comment:

**The Jordan Cove Project team will submit your comment to FERC on your behalf. Choose one of the options below to deliver your comment:**

**Option 1:** Email your comment to [action@jordancovelng.com](mailto:action@jordancovelng.com)

**Option 2:** Drop off your comment at our office in Coos Bay (201 Central Avenue) or Klamath Falls (901 Main Street)

**Option 3:** Submit your comment online at [act.jordancovelng.com](http://act.jordancovelng.com).

# More Ways to Support the Project

1

Submit a comment during each public comment period

2

Attend public hearings listed below

3

Sign up for project updates at [jordancovelng.com](http://jordancovelng.com)

We encourage you to put the following hearings on your calendar and plan to attend to show your support!

DATE	EVENT	LOCATION
May 21, 2019	Coos Bay City Council Land Use Hearing	Coos Bay
June 2019	Summer Block Parties, brought to you by the Jordan Cove Project, a Pembina Company	Coos, Douglas, Jackson and Klamath Counties
Summer 2019*	FERC Draft EIS Statement Hearings	Coos, Douglas and Klamath Counties
Summer 2019*	DEQ Air Quality Hearings	Coos and Klamath Counties
Summer 2019*	DEQ Water Hearings	Coos, Douglas, Jackson and Klamath Counties

\*dates and locations for hearings are still to be determined by FERC and DEQ

**For the most up-to-date information on public hearing dates, public comment periods and ways to support the Jordan Cove Project, please visit [jordancovelng.com](http://jordancovelng.com) and sign up for our mailing list.**

## Why is it important to comment on this project?

1. FERC and other agencies rely on public comments when weighing decisions. If comments and perspectives are not in the record, they may not be considered.
2. Positive and accurate comments demonstrate support for the project while correcting misinformation other individuals or organizations may put into the record.
3. Your voice needs to be heard in this process. If you don't comment, others will, and you may not agree with the positions they represent for your community or area of interest.
